

## Air1®

Air1® is the only AdBlue® supplier offering a quality product and service package with full control of the supply chain from the point of manufacture to delivery.

### Guaranteed AdBlue supply

Air1 provides a secure supply of AdBlue from Yara's own production plants at Brunsbüttel and Sluiskil, the biggest AdBlue plants in Europe. In addition, the unique partnership with Brenntag (t/a Albion Chemicals in the UK), the largest distributor of chemical products in Europe, gives it a delivery network unrivalled across the continent. By choosing Air1, you are choosing the industry leaders who can guarantee you will never run out of AdBlue.

### Available where and when you need it.

With a comprehensive distribution network, Air1 is never far away from your depot. Air1 can use Telemetry to monitor your stock and automatically refill your storage tank so you can be sure you will never run out of AdBlue. While on the road, you will find Air1 on the forecourt of major oil companies and independent retailers which means you can be sure of maintaining the quality of AdBlue in your vehicle tank.

### Top quality direct to your depot

Air1 is produced from a prime Urea solution, giving it an unmatched level of purity. Each batch is verified according to European quality standards so you can rest assured that your catalyst will remain in good condition. Air1 offers top quality AdBlue that will maximize your equipment's durability. It comes directly to you with no intermediate dissolving, dilution or blending, eliminating the risk of contamination.

### Flexible and customized services

Air1 offers a wide range of dispensing units and flexible financing packages. Our local field-based technicians are available to instruct your staff, and to service and maintain the smooth operation of your AdBlue storage and dispensing equipment. In addition, a local hotline is available for orders and services on 0700 4 232583 (0700 4 ADBLUE).

# Air1® Mini Bulk System, BL-3 to 10 000

## TECHNICAL DATA

<b>Housing</b>	Insulated Sandwich elements. The housing is leak tight and acts as a bund.
<b>Heating</b>	Electrical heater with thermostat
<b>Colour</b>	White with Air1 Branding
<b>Tank</b>	Single walled
<b>Volume</b>	3 - 10 000 litres, max filled volume 95%
<b>Material</b>	Polyethylene
<b>Sensors</b>	Level sensor 4-20 mA with local display and Audible over fill protection
<b>Fill Connection</b>	2" Spill free coupling, max fill speed 500 L/min
<b>Pump</b>	Leaderpump Ecodiver 1000A
<b>Flow range</b>	max. 40 L/min
<b>Dispenser</b>	Blue1 panel in stainless steel Single sided; the panel can be located on both sides Piusi Flow meter with ALX 701 Display, not approved for public use. (10 pulses/litre) Automatic filling nozzle type Elaflex with magnet, with hose balancing system, hose length approx 5.0 m.
<b>Electrical connections</b>	230 VAC, 16 A (3 x 2.5mm <sup>2</sup> ) Should be installed in non-hazardous area.
<b>Telemetry System</b>	Endress & Hauser Fieldgate GSM

### Dimensions

Volume	Length	Width	Height	Weight
3,000	2,860	990	2,300	700 kg
4,000	2,860	1,170	2,320	700 kg
5,000	3,370	1,530	2,317	750 kg
7,500	4,600	1,530	2,317	980 kg
10,000	5,820	1,530	2,317	1,250 kg
